USER GUIDE
CSCI211-Computer Architecture

To compile the program (say hello.c) and run it the steps are as follows

Step 1:

Compile the code by running the following command

sslittle-na-sstrix-gcc -o <path of resulting code> <path of the C file>

Eg:
sslittle-na-sstrix-gcc -o /home/s307-Y31615/target /home/s307-Y31615/hello.c

Step 2:

Run the sim-outorder using the following command

sim-outorder <path of the object code>

Eg:
sim-outorder /home/s307-Y31615/target
